SPECIALISTS IN ADVANCING EXECUTIVE AND TEAM LEADERSHIP

**State Department Federal Credit Union
Chief Information Officer
Alexandria, Virginia**

Located in beautiful Alexandria, this \$825 million progressive credit union has a diverse and global membership with requirements for cutting edge products and services. The Chief Information Officer role for this credit union requires a highly energetic spirit and a strong presence with top of the line leadership in a financial institution.

This role is considered to be a strategic one within the organization, intended to help establish SDFCU as a leader in the market. The CIO will play a pivotal role in achieving the credit union's long-term objective of serving members throughout the world.

If you are interested in this position, competencies as an innovator, big picture thinker, maintaining a global perspective, vision and strategy are critical success factors. Communication across multiple dimensions, people development and appreciation of diversity will be a daily practice. This incredible opportunity will allow you to meet some of the most interesting, diverse and influential people in the country.

Continued development of membership and awareness of the credit union in social, political and community venues requires strength in emotional intelligence. Experience in a leadership role in a financial organization is a prerequisite for this role. This role and organization have room for great growth and continued success.

Requirements:

- 10 plus years of Information Systems industry experience with three of those years managing associates, and two years experience in a financial institution.
- Bachelor's degree in a related field; MBA preferred.
- Comprehensive knowledge of all aspects of technology operations including network security, telecommunications and web applications.
- Proven leadership ability with strong development processes and practices experience background.
- Excellent oral, written and presentation skills (both technical and non-technical).
- Demonstrated background leading and managing critical projects.
